Obey all safety messages following these symbols. avoid possible injury or death FOR YOUR SAFETY READ ALL INSTRUCTIONS BEFORE OPERATING APPLIANCE installer. Provide these instructions to the consumer. Consumer: Keep documents for future reference. FIRE OR EXPLOSION FOR YOUR SAFETY WHAT TO DO IF YOU SMELL GAS • Open windows. • touch any electrical switch, or use any phone or radio in DO NOT vehicle. • Extinguish any open flame. • Evacuate persons from vehicle. ALL • Shut off gas supply at gas container or source. • start vehicle's engine or electric generator. DO NOT • Contact nearest gas supplier or qualified Service Technician for repairs. • If you cannot reach a gas supplier or qualified Service Technician, contact the nearest fire department. • turn on gas supply until gas leak(s) has been repaired. DO NOT FOR YOUR SAFETY ► store or use gasoline or other flammable vapors and liquids DO NOT in the vicinity of this or any other appliance. • Improper installation, adjustment, service or maintenance can cause injury, property damage or death. Refer to this manual. For assistance or additional information, consult a qualified installer, service agency, manufacturer or the gas supplier. EXPLOSION OR FIRE • Shut off all gas appliances and pilot lights when refueling gasoline tanks, LP tanks or when vehicle is in motion. • Atwood & Wedgewood gas operated cooking appliances are for use with LP gas only, and for installation in recreation vehicles only (e.g. travel trailers, motor homes, tent campers, etc.). CARBON MONOXIDE POISONING • use cooking appliance for space heating. It is a potential DO NOT danger to occupants of vehicle and damage to operating components of the range/cooktop. • A window or air vent should be open slightly while using any cooking appliance. Gas flames consume oxygen which must be replaced to assure proper combustion. 9 CAUTION avoid possible injury and/or property damage WARNING WARNING WARNING WARNING LITERATURE NUMBER LP GAS RANGE & SLIDE-IN COOKTOPS PROTECTED BY U.S. PATENTS D397,909 AND 5,931,151 • Installation •Operation •Maintenance : NOTE TO CONSUMER Have the installer or dealer show you where the main gas shut off valve is located so that you will know how and where to turn off the gas supply when necessary. Installation ..... 1-2 Maintenance ..... 3-4 Storage ..... 4 Covers ..... 4 Warranty ..... 5 Accessories / Extended Warranty ..... 14- 15 Cabinet & Counter/Recessed Bi-Fold - Cut Out Charts ..... 16 Wiring Diagram ..... 16 Installation must conform with local codes or in the absence of local codes, with the American National Standard for Recreational Vehicles, ANSI/A119.2 and Article 551, ANSI/NFPA 70. In Canada, installation must conform with CSA Z240.4.2-M. FIRE, EXPLOSION, BURN INJURY CARBON MONOXIDE POISONING • The cooking appliance must be completely separated and/or sealed from other air moving or air consuming devices such as, but not limited to, furnaces, microwave ovens, clothes dryers, cooling fans and doors or drawers in common cabinets. Failure to do so will affect the appliance(s) combustion air supply by creating either a negative or positive draft. • NEGATIVE DRAFT caused by air moving appliances may draw the top burner flame down into or toward the cooktop resulting in cooktop damage, burn hazard, explosion possibility and/or carbon monoxide buildup. • POSITIVE DRAFT may blow out the top burner flame during use resulting in an explosion and/or fire hazard and/or injury to the occupants of the vehicle. • operate the appliance in excessive windy conditions as DO NOT this may cause a negative or positive draft. 1. For proper operation of your cooking appliance: THE HOUSING CABINET MUST BE: • properly constructed. • squared to the countertop and cabinet face OPENING IN THE HOUSING CABINET MUST BE: • level from side to side and front to rear 2. For ranges, the cabinet opening must be constructed so that no combustible material can be placed next to the range sides. If there is a gap between the range and an adjacent cabinet, the gap must be closed prior to installing the range. • 30 inches is the minimum vertical distance to combustible material above the cooktop stove. This distance may be reduced by using non-combustible construction in accordance with Table 2- 6.7.2 in ANSI A119.2. 1 MPD 57279 RV, CV, RA, CA (33) Models OTHER PATENTS PENDING Effective 11/21/07 WARNING WARNING FIRE
